

Academic Olympics

The Academic Olympics Program is a college-bowl type competition between teams of students from nine Sarasota County high schools. It provides students the opportunity to participate in a competitive team effort comparable to the experience of students who take part in sports activities. Training consists of extensive review in a wide range of subjects that include Mathematics, English, French, Spanish, Science, Social Science, Arts, Computer Science, Current Events and Problem Solving. Teams participate in interscholastic matches from January through March. After final elimination matches, an All-Star Team consisting of the top-scoring students from the high school teams represents Sarasota County at the Florida State Academic Competition for Excellence held each spring at Disney World in Orlando. More than once Cardinal Mooney has been represented at the state level!
